

At-A-Glance—2008

Expert development staff

MGE is committed to use our resources to promote healthy and sustainable growth in our communities.

We help businesses get started, stay competitive and grow. Contact us at ecodev@mge.com or 608-252-5647.

Business incubators

MGE works with area business incubators to help entrepreneurs and start-up firms. Dane County is home to nine business incubators, with seven in Madison.

The incubators serve new and expanding biotech, technology transfer, light-industrial and other businesses. High-speed, state-of-the-art telecommunications are available. Incubators typically offer below-market rates, shared equipment and other assistance. We can help find the right location.

Put mge.com to work for you

The economic development section on our Web site offers many business resources:

- Regional and community info
- High-Tech Directory
- Construction Activity Report
- Business Parks and Incubators

Dependable energy partner

Business needs reliable energy service. MGE has the know-how to make it happen. When Team Technologies wanted dual electric feeds and backup generation for a new state-of-the-art data center, MGE delivered.

“MGE listened to our needs and worked very closely with us,” said Don Larson, Director of Operations, TEAM Technologies, (above right) with John Drury, MGE Business Development Manager. TEAM provides primary, secondary and disaster recovery data center services to the financial, insurance, healthcare and other industries.

Our experienced economic development staff can connect your business to a vast array of resources at MGE and in the community.

Unique support network

Emerging technology companies can find financing from the Venture Debt Fund, created by MGE and its partners. The fund has loaned out \$2 million since 2004. Capital comes from MGE’s lead investment, local banks and City of Madison block grants. The Madison Development Corp. administers the loans.

Contact MGE for information on financing, venture capital groups and angel networks.
