

business in the green?

Right now you can ‘green-up’ your bottom line by purchasing renewable energy generated by the wind and the sun. You have the power to offset the carbon dioxide emissions from your electricity use and do it at a surprisingly affordable price. An average small business can offset all of their carbon dioxide emissions for about \$13 more each month. To sign up, go to **mge.com/greenbiz** and choose to green power tomorrow, today.
