

outdoor security lighting

Make your business safer at night

Lighting keeps your property secure during the evening and throughout the night. Employees, customers and tenants appreciate well-lit parking and common areas. Outdoor lighting also enhances your property by making it more visible and attractive.

Service from MGE

Important reasons to consider our security lighting service are:

- Free installation in most cases
- Low monthly rate includes the fixture, pole, electricity and maintenance
- Automatic dusk-to-dawn operation just like a street-light
- Billed monthly on your MGE bill

Lighting choices made easy

We'll select the lighting system to best meet your needs, whether for area lighting or floodlighting. We use energy-efficient metal halide and high-pressure sodium lamps that are pole-mounted.

What's the first step?

Call 252-7222 and ask for a Security Lighting Service representative. We survey the building and parking areas to determine the number and type of lights needed. You'll receive a lighting plan to address your security concerns.
