# Business Services and Prices

Effective January 1, 2012

## Basic Utility Rates

Effective Jan. 1, 2012.

We take seriously our responsibility to provide reliable energy at reasonable rates. Before setting new rates, the Public Service Commission of Wisconsin reviews our rate request and listens to customers' suggestions and proposals.

We recognize the economic downturn has been difficult for many of our customers, and we work to control our costs.

The approved electric rate increase reflects:

- (1) Increased fuel costs for the production of electricity and higher market costs for wind power.
- (2) Improvements to the state's electric transmission system.
- (3) Increased mandated payments to the statewide energy efficiency and renewables program.
- (4) Decreased costs associated with the Elm Road Generating Station.

In addition, MGE's application included a \$14.5 million deferral of costs associated with recently enacted federal air pollution rules. These deferred costs were not included in 2012 rates.

MGE's natural gas service rates reflect a slight increase in mandated payments to the statewide energy efficiency and renewables program.

### How can I control my costs?

While you don't have control over the price, you do have control over your energy use. Track your energy use online at [mge.com/compareuse](http://mge.com/compareuse), and for energy-saving ideas, visit [mge.com/bizenergy](http://mge.com/bizenergy).
