

Recreation Field Restoration

The West Campus Cogeneration Facility construction storage area is being restored with an improved recreation field and stormwater management system.

Restoration improvements include:

- Better drainage to increase quality and availability of fields.
- New, innovative stormwater ponds and underground infiltration system to enhance water quality.
- Improved turf for a better playing surface.

Restoration Schedule

May - Aug 2005

Sept 2005 - Sept 2006

Fall 2006

Fall 2007

Infiltration system construction, soil movement and grading

Plant and establish turf and stormwater basin landscaping

Construction completion

Field open for use
