

**Commercial and Industrial Lighting and Power Time-of-Use Rate**

**AVAILABILITY**

This rate schedule is mandatory for commercial and industrial customers with a maximum monthly 15-minute demand in excess of 200 kW. If a customer's demand fluctuates above and below 200 kW, this rate schedule is mandatory if the demand exceeds 200 kW in at least four out of 12 months. Customers will not be removed from this rate schedule unless their maximum monthly 15-minute demand remains below 200 kW for 12 consecutive months.

If a customer receives service through more than one electric meter at a single location, the amount of electricity (demand and energy) supplied through all such meters will be combined in applying this rate when the criteria set forth in Combining Meters, below, are met.

**RATE**

	Summer	Winter
Customer charge per day.....	\$5.22740	\$5.22740
Distribution service: Customer maximum 15-minute demand per kW per day.....	\$0.09863	\$0.09863
R Demand service: Maximum monthly on-peak 15-minute demand per kW per day ..	\$0.39765	\$0.32537
Electricity service:		
R All on-peak kWh, per kWh .....	9.866¢	8.929¢
R All off-peak kWh, per kWh .....	5.329¢	5.329¢

Summer rates are effective from June 1 through September 30. Winter rates are all times of the year other than the defined summer season.

**MINIMUM MONTHLY CHARGE**

The minimum monthly charge will be the customer charge plus the demand charge for the customer maximum 15-minute demand.

**PAYMENT**

Payment is due not later than the due date shown on the bill. Any Company billing charges unpaid after the due date will be subject to a late payment charge as described in the Company's electric service rules under Late Payment Charge.

**PRICING PERIOD DEFINITIONS**

On-Peak Periods	10 a.m. through 9 p.m.: Monday, Tuesday, Wednesday, Thursday, and Friday, excluding holidays.
Off-Peak Periods	12 midnight through 10 a.m. and 9 p.m. through 12 midnight: Monday, Tuesday, Wednesday, Thursday, Friday, plus all day Saturday, Sunday, and holidays.
Holidays	New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving, and Christmas.

**DETERMINATION OF DEMAND**

1. All monthly demand and energy usage will be measured by recording demand meters installed and maintained by the Company. Estimates made by the Company, based on historic records plus known load characteristics, will be used for billing purposes if meter failure occurs.
2. The customer maximum 15-minute demand will be the greatest rate at which electrical energy has been used during any period of 15 consecutive minutes in the current or preceding 11 billing months.
3. The maximum on-peak 15-minute demand will be the greatest rate at which electrical energy has been used during any on-peak period of 15 consecutive minutes in the billing month.

### PRIMARY DISCOUNT PROVISION

Available to customers not served by the low-voltage network.

1. For delivery at:
  - a. 2,400 volts or 4,160 volts as available to customers with demands of 200 kW or more.
  - b. 13,800 volts where available to customers with demands of 500 kW or more.  
  
\$0.00328 per kW per day of customer maximum 15-minute billed demand plus 0.1¢ per month per kWh.
2. For customers qualifying under No. 1.a. and 1.b. who provide the transformers and associated equipment necessary for converting the available primary service to the secondary voltage required by the customer.  
  
\$0.00328 per kW per day of customer maximum 15-minute billed demand.
3. Customers taking service at primary voltage will provide all the necessary delivery, control, and regulating facilities on the load side of the transformers.

### CHARACTER OF SERVICE

For lighting and power service, 60-cycle, alternating current is provided at the voltage levels specified in the Company's electric service rules and regulations.

### COMBINING METERS

When a customer receives electric service through more than one meter at a single location (premise), the demand and energy usage for each meter will be combined for billing purposes under the following criteria:

1. Meters will be combined only if they are within the same service classification. The different service classifications are:
  - a. 120/240-volt single-phase.
  - b. 240-volt three-phase.
  - c. 460-volt or 480-volt three-phase.
  - d. 120/208-volt single- and three-phase.
  - e. Emergency equipment meter as required by code.
  - f. 277/480-volt three-phase.
  - g. 2,400/4,160-volt three-phase primary.
  - h. 7,970/13,800-volt three-phase primary.
2. The usage of a meter will be combined with the usage of one or more other meters only if the maximum monthly 15-minute demand of each meter exceeds 100 kW for at least 4 out of 12 months.
3. If the customer requires more than one service connection to the distribution system and the service connections are physically separated so as to prevent the use of meter loops, the customer would have multiple meters for the same service classification.
4. If more than one customer is served at a physical location, the meters for two or more customers will not be combined.
5. Current service rules pertaining to serving a customer at two or more buildings still apply.

### SPECIAL TERMS AND PROVISIONS

1. Customers who have their meters turned off and back on within a 12-month period will pay the minimum monthly charges, applicable to the customer, for the months while service was not being used.
2. New customers initiating service served under this rate schedule will be placed on this rate schedule when their initial demand exceeds 400 kW. When the new customer's demand is between 200 and 400 kW in the initial months of service, the customer will have the option of being placed on Cg-4 Level B rates until the customer has four months with demands in excess of 200 kW.
