Madison Gas and Electric | mge.com/rates

As your community energy company, MGE takes seriously our responsibility to provide safe, reliable, affordable and sustainable energy for the people and businesses we serve. We understand that energy is an essential service, and we are especially mindful of the impact our costs can have on customers. That's why we continue to work hard to manage and contain costs across our organization while making thoughtful, long-term investments in cleaner energy and a reliable energy system—investments made for the benefit of our community today and for generations to come.

Effective Jan. 1, 2026, electric and natural gas rates changed.

In 2025, MGE worked collaboratively with community and customer representatives in our regulatory process to reach a unanimous rate settlement agreement that resolved all issues in our rate case. The Public Service Commission of Wisconsin (PSCW) reviewed and approved this agreement, which established our electric and natural gas rates.

Electric

- A typical MGE residential electric customer using 500 kilowatt-hours (kWh) per month will see an increase of about \$0.13 per month.
- Impacts for non-residential electric customers vary by rate class.
- The primary drivers of the change are investments in local generation resources and ongoing grid modernization projects that help ensure reliable electric service for our community.

Natural Gas

- A typical MGE residential natural gas customer using 720 therms per year will see a monthly bill increase of about \$1.91.
- Impacts for non-residential natural gas customers vary by rate class.
- The primary driver of the change is continued investment in system modernization projects that support a safe, dependable natural gas system serving our community.
