## Know what's below—call before you dig.

All digging projects, no matter the size, can pose a safety threat. Always contact Diggers Hotline at least three business days before you plan to dig on your property. It's not only smart—it's the law!

Diggers Hotline works with MGE and other participating utilities and municipalities to identify buried lines on your property so you can dig freely and safely.

**Call 811 first. It's the law!**

The 811 logo is a registered trademark of the CGA.

**Damaging underground pipes or cables is dangerous—and can be expensive!**

**Call 811 anytime, 24/7, or submit a request online at [diggershotline.com](https://diggershotline.com).**

**Contact Diggers Hotline at least 3 working days before digging.**

**If you damage a gas line while digging, call 911 and MGE (608-252-7000) immediately.**

**Scan the code or visit [mge.com/diggershotline](https://mge.com/diggershotline) to learn more.**
