Madison Gas and Electric

Effective January 1, 2024

Basic utility services

Effective January 1, 2024

We take seriously our responsibility to provide safe, reliable energy at reasonable rates. We work hard to control our costs.

In 2023, MGE filed an application with the Public Service Commission of Wisconsin (PSCW) to increase electric and natural gas rates in 2024. The PSCW approved some changes, setting our electric and gas rates.

Overall electric rates will increase 1.54% in 2024. Electric costs for 2024 include investments made in the West Riverside Energy Center, solar investments and continued investments in grid modernization projects. The collection of the escrow accounts for uncollectible costs, including costs related to COVID, also are included in electric costs for 2024.

The approved natural gas distribution and gas supply service rates reflect an overall increase of 2.44% across all customers in 2024. The primary reasons for the gas increase are continued investments in system modernization projects to maintain a safe and dependable system and the collection of the escrow accounts for uncollectible costs, including costs related to COVID.

Visit mge.com/bizrates for more information on 2024 rates.

Green Power Program

Green Power Tomorrow (GPT) is MGE's optional renewable energy program for electric customers. GPT offers customers a convenient, flexible, affordable option for supporting green energy. The premium to participate remains at one cent per kilowatt-hour. The PSCW approved MGE's request to add a new GPT 100 option for customers in 2024. To learn more, visit mge.com/GPT.
