

We Make It Easy To Go Green!

mgOe[®]
your community energy company

Our Green Power Tomorrow (GPT) program is a clean energy option for eligible customers who want to support clean energy resources that serve our community, such as our new 66-megawatt Saratoga Wind Farm and solar projects under construction.

At only a penny more per kilowatt-hour than our standard rate, GPT gives you the option to purchase electricity generated by our wind and solar resources. Whether it's \$1 per month or 100% of your electricity use, you determine the monthly amount of electricity purchased under GPT. Our GPT program is one of the easiest, most flexible and affordable ways to show your support for growing clean energy.
